Did you know...

Groundhog Day is held on February 2nd every year. According to legend if the groundhog sees its shadow there will be 6 more weeks of winter; if it does not see its shadow, there will be an early spring!

Groundhogs are also called woodchucks

They are part of the rodent family (so are squirrels, beavers and porcupines!)

Groundhogs can climb trees and swim

They spend the whole summer eating so they have enough fat stored on their body to sleep all winter long!
